Perform this up to 3 times. 5. If this does not work, perform Deep Cleaning And if that not work Some times it needs a good clean up but this is up to you if you want to do this, But after you done this prime the printer so it gets the inks back in the heads, it may take a little time for the inks to work. Ok. There is fluid cleaner for this but I can never find any in the shops the only ones I seen is when they sell them in Tesco but they come in with the ink refill bottles so I just use worm water by it self on a cloth and dabbing on the heads to clean them, it will not harm the heads but not to much water.http://azlawncare.com/userfiles/john-deere-510b-manual.xml

Some heads are on the inks them self but some have them inside the printer so I not know your printer so if the heads are inside you need to get them out you may find that some heads will just clip out put some need to be unscrewed so you got to know how they come out so be careful and not push to hard on them, if the heads are on the ink then it is a easy job to clean them, It worth a try it worked for me more than ones. Please all I ask is call back and just gave a vote, it will gave me some satisfaction to know am helping some one, so I will keep on helping. All The Best Pineworks Make sure you dont have an empty large black cartridge. Login to post If not, possibly print cartridges need cleaning. If printer has separate print heads, they made need cleaning. Lastly, print heads may need replacement.You can access this function from maintenance menu on the printer driver. Be sure also to print the document in high quality mode when you meet such the problem. If the problem still persist you may need to clean film timing slit of the printer. The following may be useful for your problem. Good luck. Print Head Alignment Correct The Misalignment of Colors and Lines First you would have to uninstall existing driver, reboot, THEN install the new driver then reboot and see what happens.Look for any black dusk or small pieces of paper inside. You might use a hoover carefully.If i change the color everything is fine but black will skip lines and such. Please help! Cant turn in job. If you remove the inks and then the printhead, you can wet and fold a paper towel and just dab the printhead gently on the wet towel. When you see a solid black line on the paper towel your printing should be improved.You need to repair it. It will not cost you much. Let me know if I can assist you further.
